Rocket Riot goes Ind(i)pendent

After a great partnership with Microsoft, Codeglue received a surprising email one day proclaiming the independence of [Rocket Riot](#). The studio was free to publish the game themselves! Once the studio found the time to further develop the game, they made sure the game was compatible for Windows 10 devices (phone and PC), this in addition to the earlier releases on Xbox 360, iPad, iPhone and Windows 8 devices.

Also, Codeglue made sure to make Rocket Riot available on the [Steam store](#) as this game is definitely a fit for all chaotic-indie-shooter players that are just dying for a healthy rocket-propelled explosive banana snack.

Rocket Riot is an action-packed, side-scrolling shooter with over 200 single player missions in an amazing-looking pixel art world. You can blast your way through the 8-bit styled environment or hide behind it, battling a plethora of peculiar enemies you haven't encountered before in your life.

The [Rocket Riot OST](#) from Sonic Picnic is offered separately containing 13 audio tracks including a mega mix!

During the launch week of Rocket Riot a bundle will be on sale with a 10% discount; giving you the full game and the Rocket Riot OST.
